## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The allowable subject matter set forth in the last office action was in error. A further review of the references suggests to examiner that more of the claims should have been rejected in the last office action. Claim 28 stands allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-9, 15-18, 24-27, 29-34 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Cain (5,681,608).

Cain discloses nutrient fats having improved digestibility. The triglycerides contemplated include all of the species shown in the claims (see abstract). The use of the triglycerides in foods is shown at column 3, lines 4-12. The intended use of the composition "for reducing lipids in the blood" does not carry any weight in the product claims. But the improved digestibility of the fat would lead one to suspect that this property would have been inherent to the use of this fat.

The range of MLM in claim 6, 15 and 24 falls within the range of this triglyceride in claim 2 of the Cain reference (which is 10-50 wt%) . Thus the amount of this particular triglyceride would have been either identical to that of Cain or an obvious variant thereof.

With regard to claim 7, 16 and 25, the LLM and/or MLL values are shown in claim 1 of Cain to range from 5-65%. The high number, in this case is identical to that value set forth in claim 7.

Although the specific special orientation of the compound is not recited, examiner cannot distinguish one component from another in this case because the two species are mirror images of each other and the fat in Cain is a synthetic fat. Thus one of ordinary skill in the art would anticipate that L could be only one component fatty acid.

Claim 28 is allowed.
